EAVESDROPPING ON NATURE: VOICES IN THE DARK

Joe Szewczak, B.S.E., Ph.D., is a Cal Poly Humboldt professor specializing in bat physiology and ecology. He developed SonoBat and SonoBird, software for analyzing bat and bird vocalizations, and has taught wildlife field courses worldwide.

An Evening Lecture at the Natural History Museum Presented by resident bat expert, **Dr. Joe Szewczak**

Have you ever wondered what the night sky sounds like? Join us at the museum for a fascinating evening with Cal Poly Humboldt's resident bat expert, Dr. Joe Szewczak. Joe will take us inside the hidden, high-frequency world of bat echolocation. Discover the tools and methods biologists use to extend our reach into this realm to eavesdrop on bats and know what they are doing and who's doing the talking.
