

From Frogs & Bacteria to DNA: A Musical Science Journey

Catalina Cuellar-Gempeler, PhD

Associate Professor
Department of Biological Sciences
Cal Poly Humboldt

FRIDAY, DECEMBER 13, 2024 6:30-8PM

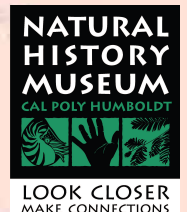

The mysteries of the biological world are alive with music. Join the NHM in this presentation that will take you from the songs of frogs to the dynamic code embedded in DNA. With original music by Marine Snow and a selection of faculty from the department of Biological Sciences, Learn about environmental issues, obscure marine organisms, microorganisms living inside you, carnivorous plants, epigenetics, and more!

No issue is too strange to marvel about our living world, recognize we still have a lot to learn and sing along to catchy tunes.

The Natural History Museum of Cal Poly Humboldt.
