

AT NATURAL HISTORY MUSEUM CAL POLY HUMBOLDT
**DISCOVER WHAT'S HAPPENING AT
REDWOOD NATIONAL AND STATE PARKS!**

Presented by: Steven Krause
Park Ranger & Guide at
Redwood National & State Park

At the NHM Classroom
1242 G Street, Arcata
(just behind the museum)
Thursday March 28, 2024
@6:30 pm

Ranger Steven Krause received his BS in Environmental Management and Protection with a focus in Environmental Education and Interpretation at Cal Poly Humboldt. Steven has been called a “walking encyclopedia” and is a great asset to our community and the parks. He is knowledgeable in many fields including Natural resource and conservation. Steven ran the Humboldt Herps society from 2007 to 2011 and has given many talks at the Natural History Museum.

Come learn about the latest projects going on at Redwood State and National Parks, including the **Redwoods Rising Project** and the **California Condor Reintroduction Program**. The Redwood National and state Parks are home to almost half of the world's remaining protected old-growth redwood forests. These parks safeguard imperiled salmon and trout, and rare creatures such as the marbled murrelet, Humboldt marten, snowy plover, and many endangered plants.
